

To: Deans, Directors and Department Heads

From: Sylvia Johnson, University Information Security Officer

Date: June 19, 2008

Subject: Information Security Policy

I am pleased to announce the final approval of the Information Security Policy. The Faculty Senate passed a resolution to support its implementation on March 3, 2008, and President Shelton approved it on May 27, 2008. Vice Presidents, Deans, Directors, Department Heads and Heads of Centers have ultimate responsibility for implementation of the policy within their respective units.

Approval of the policy is a crucial step toward securing sensitive and critical institutional information assets. As the next step, the Information Security Office is initiating the Securing UA campaign. The campaign's initiatives, measures and tips will offer you the means for achieving greater security of your unit's information assets. Look for our announcements over the coming months.

The University's Information Security Policy and the supporting standards, procedures and guidelines can be found on the Information Security website at <http://security.arizona.edu/policy>. For more information, please contact the Information Security Office at 621-UIISO (8476).
